SUMMARY

React Native Developer with 1.3+ years of experience in full-stack development (MERN) and hands-on expertise in building scalable mobile applications. Proven ability to develop high-performance apps, optimize user experience, and integrate robust backend systems. Strong focus on writing clean, maintainable code and delivering production-ready solutions.

EDUCATION

Master Of Computer Application/ Lokmanya College of Computer Application (GTU)

Aug 2024 – Aug2026

- Average CGPA: 7.5/10.
- Built features for lead tracking, automation, and intelligent insights to improve business conversion workflows.
- Focused on practical implementation of full-stack and mobile application development concepts.

Relevant Coursework: Data Structures, DBMS, Operating Systems, Mobile Development.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C, C++, HTML, CSS | **Mobile:** React Native, Expo |

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3 | **Backend:** Node.js, Express.js |

Databases: MongoDB, Firebase, Supabase, Prisma | **Tools:** Git, GitHub, Postman, VS Code | **Concepts:** REST APIs, Authentication, State Management, Performance Optimization

WORK EXPERIENCE

Software Developer | Torrenza Mould Craft Pvt Ltd | Ahmedabad

July 2024 – Present

- Planned and Code a domain-specific ERP system for an injection mould manufacturing company, automating workflows including production tracking, dispatch, billing, settlement, and reporting, reducing manual operations by 40%.
- Applied smart automation features such as invoice reminders, pending payment tracking, and real-time dashboards, improving operational efficiency and business visibility.
- Streamlined existing web applications by identifying and fixing critical bugs, improving system performance and reducing load time by ~20%.

Web Developer Intern / Grownited Private Limited | Ahmedabad

Jan 2024 – June 2024

- Enhanced responsive and dynamic web applications using modern JavaScript frameworks, ensuring seamless cross-device user experience.
- Integrated RESTful APIs to enable efficient communication between frontend and backend systems.
- Enforced state management using Redux / Context API for efficient data flow and improved application scalability.
- Built reusable UI components, improving development speed and maintainability.
- Improved forms with validation and error handling to enhance user interaction and reliability.
- Executed authentication UI flows including login, signup, and session handling.

PROJECTS

Last24Hrs – Social Media Application

[Live](#)

Tech: React Native, Supabase.

- Built a cross-platform social media application using React Native with secure user authentication and Supabase backend integration.
- Administered post creation and real-time feed system, enabling users to share and view content seamlessly.
- Created an auto-expiring content feature where posts are deleted after 24 hours, improving content freshness and user engagement.
- Integrated Supabase for real-time database operations and efficient data synchronization.
- Expanded scalable and responsive UI components to ensure smooth performance across devices.
- Enhanced application performance and data handling for faster load times and better user experience.

Mold Track – ERP System

[Live](#)

Tech: React.js, Node.js, Express.js, MongoDB.

- Engineered and delivered a domain-specific ERP system for an injection mould manufacturing company to streamline end-to-end business operations.
- Automated critical workflows including mold lifecycle tracking, production management, dispatch, billing, and settlement processes.
- Executed smart features such as invoice reminders, pending payment tracking, and real-time operational dashboards for improved decision-making.
- Accelerated system performance by resolving critical bugs and enhancing application speed by ~20%.
- Programmed role-based access control to manage permissions for different user types (admin, staff, etc.)
- Ensured data consistency and reliability across modules for smooth business operations.
